- ▶ INDUSTRY-LEADING SECURITY SOLUTIONS FOR ULTIMATE DATA/DOCUMENT PROTECTION

The new MX-2610N - introducing the world's first multifunction system to be equipped with 'finger-swipe' touch control - a design evolution which is rapidly becoming an industry standard. Similar technology has already revolutionised smart phones and tablet PCs. Simply touch or tap the screen, then flick or slide for fingertip control of every document, function and setting. These next-generation MFPs support the very latest working practices. You can add full internet access for browsing and printing out web content, and the latest version of Sharp OSA will enable you to connect to the 'Cloud' and run Software as a Service (SaaS) applications developed by Sharp's Technology Partners. Plus there is a handy Remote Access Control facility that lets support staff perform configuration, troubleshooting and ad hoc training across the network. In other words, you get the power, versatility and convenience that every modern office needs. The 26ppm MX-2610N produces top quality colour at full speed and comes with two-sided printing, copying, scanning and robust security as standard. You can also add a wide range of options to raise productivity across the office. Choose a space-saving inner finisher with electronic sorting and offset stacking, or a saddle-stitch finisher for easy, professional-looking documents. Add fax functionality, extra security, additional paper drawers with 'easy grip' handles, and third party applications for automating manual office tasks. The Energy Star-certified MX-2610N uses Sharp's latest energy-saving technology for a typical electrical consumption among the lowest in their class. A rapid warm up time, an efficient LED scanner, self-adjusting and pre-set auto shut down capabilities and a special Eco Scan Mode all help to save money and support your environmental objectives.
